Proprietary EDGAR sourcing, updated daily

TRANSFORM COMPLIANCE COMPLEXITY INTO A POSITIVE CUSTOMER EXPERIENCE

Variable annuity/variable life contract holders shouldn't have to waste time digging through large (and sometimes outdated) PDFs on your website. Variable Products Express (VPX) uses proprietary linking and layering technology to make navigating between documents, or within a document, simple and convenient.

VPX uses proprietary linking and layering technology to adhere to all aspects of SEC rule 498A, making it possible to navigate between product and fund documents in a compliant and customer-friendly manner.

AUTOMATE WEB PRESENTMENT AND FREE UP INTERNAL RESOURCES

Designed for the variable products market, our simple, web-based solution is mobile-enabled and summary prospectus ready. Broadridge automates the fulfillment process and seamlessly integrates with your website, so your marketing team can focus on content, not compliance.

RELY ON A SINGLE, POWERFUL SOLUTION

Create a user-friendly resource for contract holders with a single solution. VPX links all product documents to related subaccounts with simple navigation. It automatically updates information daily with the latest EDGAR filings. You can support the latest smart devices and browser upgrades, and keep contract holder on your site, rather than clicking to fund partner webpages.
